Physics Focus Test-3

60 min	25	100	2
Duration	Questions	Maximum marks	Sections

General instructions

- **PHY SEC 1**: 20 single-correct questions. Choose one of four options.
- **PHY SEC 2**: 5 numerical questions. Type an integer answer (digits and a minus sign only).
- Use the question palette on the right to jump to any question. The countdown shows **Time Left**; the test submits itself at 00:00.
- Your answers are saved as you select them. Refreshing the page returns you to the same question with the same time left.
- Best attempted in fullscreen. Leaving the tab is recorded as a violation and shown on your result. It does not change your marks and never auto-submits.

Marking scheme

Correct Answer	Incorrect Answer	Unanswered
+4	−1	0

The same scheme applies to numerical questions.

Performance | Answers | Coach

Attempt : Oct 15, 2026, 2:11 AM

Hello there,

Keep Improving!

Rank 249 of 480 · simulated

Rank and percentile compare you with 480 invented students.

MARKS **104** out of 300

Overall Question Analysis

Total Questions	Attempted		
75	**71** (95%)		
Correct	Incorrect	Unattempted	Attempt Accuracy
35	**36**	**4**	**49%**

Time Taken: **107:15** /180 mins

Score Boost

You scored **104/300**. Estimated JEE Main percentile **~47.7** (simulated).

You're a **Fast Risk-taker**, you attempt almost everything, but accuracy is costing marks. Slow down on questions you cannot narrow down.

Discuss with Coach

2 quick actions to gain **43 marks** & improve your Rank from **249 to 113** (simulated)

Easy Kill Topics

This test had **30** easy questions. You attempted **28** and got **21** right (**75%** accuracy). You missed about **~43** potential marks. Solve these first.

View Topics

Wrong Answers

You lost **196** marks in total: **180** from 36 wrong answers (4 missed + 1 penalty each) and **16** from 4 unattempted questions.

- **Sequences and Series** — MAT 0/4 right · 20 marks lost — Start
- **Atomic Structure** — CHE 1/5 right · 18 marks lost — Start
- **Ray Optics** — PHY 1/4 right · 15 marks lost — Start

Time Traps

No time traps. Good pacing.

Attempt Strategy

Your accuracy on attempted questions is **49%**. A guess only breaks even at 20%, so on questions you cannot narrow down, skipping protects marks.

Types of Mistake

- Concept or calculation slip: 27
- Rushed: 8
- Not attempted: 4
- Stuck, then guessed: 1

Study Plan, next 3 days

Day 1: redo missed questions in Sequences and Series from the Answers tab, then a 10-question practice set.
Day 2: same for Atomic Structure. Read each solution first.
Day 3: reattempt this test and aim to beat 104.

Physics Focus Test-3

Here's a summary of your last 5 test performances, most recent first:

- **Physics Focus Test-3**: -2 / 100, accuracy 0%
- **Maths Focus Test-2**: 42 / 100, accuracy 57% (sample)
- **Physics Focus Test-2**: 44 / 100, accuracy 62% (sample)
- **Part Test-1 (JEE Main pattern)**: 104 / 300, accuracy 49% (sample)
- **Maths Focus Test-1**: 17 / 100, accuracy 35% (sample)

What would you like to look at?

Where did I lose the most marks?

You lost **102** marks: 10 from wrong answers and 92 from skipped questions.

- **Current Electricity**: 62 marks
- **Thermal Physics**: 20 marks
- **Waves and Sound**: 20 marks

👍 👎

why did i lose marks in Kinematics

You lost **102** marks: 10 from wrong answers and 92 from skipped questions.

- **Current Electricity**: 62 marks

Where did I lose the most marks? | What should I revise first? | Was my timing okay?

Which easy questions did I miss? | How do I compare with my last tests? | What does my rank mean?

Should I guess?

Practice

Ten questions from one chapter, with the answer and solution shown right after each one.

Start a set

Your weakest chapters so far: Sequences and Series, Current Electricity, Quadratic Equations.

Chapter Sequences and Series

Start 10 questions

Practice

Ten questions from one chapter, with the answer and solution shown right after each one.

Sequences and Series

Question 1 of 10

The sum of the first n terms of a sequence is $S_n = n^2 - n$. Find its 10th term.

A 20

B 18

C 19

D 90

Not quite. $a_{10} = S_{10} - S_9 = (90) - (72) = 18$.

About this app

A practice product for JEE Main, built to be honest about what is real and what is not.

What is real

- The test window, timer, palette, section jumps and resume-after-refresh.
- Marking: +4, -1, 0, including on numerical questions. Scores are computed from your answers.
- Your own insights: marks lost, chapters, sub-topics, time and mistake types.

What is placeholder or simulated

- **Questions** are auto-generated placeholders (parametrised templates), each with its answer checked by a second method. Replace them with your own question bank before real use.
- **Rank, percentile, topper and leaderboard** come from 480 invented students and are always labelled simulated.
- **The Coach** is a set of fixed rules over your numbers. It is not an AI model.
- **Answer keys** live in this page so it can run offline. A real product keeps keys on a server.

Known problems this app avoids

- Answers save as you tap, with a retry and a warning if the browser blocks storage.
- Save & next is never disabled. Marks are shown on the instructions page, not as a placeholder.
- The submit table includes Not visited and adds up to the total. The reason is optional.
- Wrong answers show the correct option. Solutions are text. Time is mm:ss.
- Chapter analysis covers every question, and "last attempts" means the most recent ones.
- Tab switching is recorded and explained up front.
